Want to make more money? Then take a look at your market: what are the industry's most sought-after skills - and do you have them? Would taking on more responsibility make you more valuable, or could you get a better salary at a larger design firm? Whether you're starting a new job or looking for a raise, payroll data and a deep understanding of your most wanted skills will strengthen your negotiating power. So before you sit down with your boss, make sure you are confident in your value. Here's what you need to do...

01. Cash Comparison Before you can convince your boss that you are undervalued, you need some wage data in hand. Use a salary check or survey to get an idea of what everyone else is earning. For example, try the Brand Republic Jobs Salary Checker for the UK, AIGA's US or Canada tool, to see the results of the 2012/2013 RGD and Creative Niche survey or the 2013 TCG manual. You can also view information around the world in the coroflot payroll guide (first you will need to submit your own data).
02. Raise hopes Check whether your employer is running routine pay reviews. If not, try asking for it. Major Players Salary Review 2012 found that one in six creative and marketing staff in the UK received internal promotion last year. Of those who did not, 47 per cent still receive a pay rise. If you don't ask...
03. Do this without waiting for management to offer you a promotion: do it yourself. Look for opportunities inside your studio or agency to take on new responsibilities, or consider a sideways move - apply for similar positions in larger, more profitable companies. Skills that pay coding, software development - highly technical skills are undoubtedly in high demand in design. But employers don't just want technical skills: they want people who understand how technology can be used to create new businesses. If you know how to apply these resources, you will be evaluated. Stop, collaborate and listen According to a survey by Creative Group in Paylandia, 39 percent of creative employers say teamwork and collaboration skills are the most important factors in making new hiring, while 16 percent rate creativity as the number one thing they're looking for. Where's the money? Roles in packaging, exhibition graphics and branding tend to pay a little better than print schedules, while digital and information technology offer some of the best salaries around. Digital skills are in particular demand: according to creative career expert Boss Group, the most desirable skills lie in user experience, mobile and You have to be in it... Loves Design Week, Creative Pool, Brand Republic and Behance list creative works, like Creative Bloq, but employers are increasingly turning to social media to fill vacancies - so make sure you have a professional presence on Twitter and LinkedIn, and keep an eye on what is being posted. Does the capital call the capital more profitable? In B Creatives working in London earn 10-15 percent more on average, according to the Design Week Wage Survey. But there are plenty of vacancies in other parts of the UK such as Manchester and the North West - where the cost of living is cheaper. Outside London, the digital sector is paying particularly well. Premium places, capitals don't always have the highest paid jobs. In America, the highest design salaries are in San Jose and San Francisco, California and Framingham, Massachusetts, followed by Washington and New York. Perk Up Earning more cash doesn't always mean you'll be better off, so if you decide to move to pastures new, don't just look at salary figures. Consider the cost of any company benefits such as pensions, parental leave and company benefits. Keep in mind the cost of local living. Words: Ann Wollenberg Images: Jared Nickerson These tips were first published in the Design Career Handbook from Computer Arts. The latest update on September 2, 2020 Personal Finance can push anyone to a point of extreme anxiety and anxiety. Easier said than done, planning finances is not an egg designed to cart everyone. That's why most of us often live to pay a check to pay a check. But has anyone told you that it's not really a difficult task to achieve your financial goals? In this article we will understand ways to set financial goals and actually accomplish them with ease.
- 4 Steps to setting financial goals While setting financial goals can seem like a challenge if someone has the will and clarity of thought, it is quite easy. Try using these steps to get you started.

1. Clearly about the goals of any goal without a clear purpose is nothing more than a dream pipe, and this could not be more true for financial matters. It is often said that savings are nothing more than deferred consumption. Therefore, if you save today, then you should be crystal clear about what it is for. It can be anything including your child's education, retirement, marriage, dream vacation, fancy car, etc. once the goal is clear, instill monetary value to that goal and timing. An important point at this stage of setting goals is to enumerate all the goals you anticipate in the future and put value on each of them.
2. Keep the goals realistic It is good to be optimistic, but being Pollyanna is not desirable. Similarly, while it may be good to keep your financial goals a little aggressive, going beyond what you can actually achieve will definitely hurt your chances of making meaningful progress. It is important that you keep your goals realistic, as this will help you stay the course and keep you motivated throughout the journey.
3. Accounting inflation Ronald Reagan once said: Inflation is as violent as as scary as an armed robber and deadly as a hitman. This quote sums up what inflation can do to your financial goals. So accounting for inflation whenever you put monetary money to a financial goal that is far in the future. For example, if one of your financial goals is your son's higher education, which after 15 years, then inflation will increase the monetary burden by more than 50%, if inflation is only 3%. Always consider this to avoid falling behind on your goals.
4. Short-term Vs Long Term Just like each calorie is not the same, the approach to achieving each financial goal will not be the same. It is important to split the goals in the short and long term. As a rule, any financial goal, which should be in the next 3 years, should be recognized as a short-term goal. Any longer goals should be classified as long-term goals. This bifurcation of goals in the short and long term will help in choosing the right investment tool to achieve them. By now, you should be prepared with your list of financial goals. Now it's time to go to all and reach them. How to achieve your financial goals Whenever we talk about chasing any financial goal, this is usually a two-step process: Providing healthy savings Creating Smart Investments you will need to save enough and invest those savings wisely so they grow over a period of time to help you achieve your goals. Ensuring healthy self-fulfillment savings is the best form of implementation, and if you decide what your current financial situation is, you're not heading anywhere. This is the focal point from where you start your journey to achieve financial goals.
1. Track costs The first and most important thing to do is to keep track of your expenses. Use any of the mobile app cost tracking to record your spending. Once you start doing this diligently, you'll be surprised at how small the costs add up to a significant amount. Also, classify these costs into different buckets, so you know which bucket eats most of your check. This accounting will pave the way for reducing not-wanted spending and pumping up your savings rate. If you're not sure where to start when tracking your spending, this article may be able to help.
2. Pay yourself first in general, the economy comes after all expenses have been taken to take care. This is a classic mistake in setting financial goals. We pay ourselves the last! Ideally, this should be planned upside down. We must first pay ourselves, and then the whole world, that is, first choose the planned amount of savings and manage all expenses with the rest. The best way to actually implement this is to put savings in automatic mode, i.e. money coming automatically into various financial instruments (mutual funds, retirement accounts, etc.) each month. Taking an automatic route will help free up some control and force us to manage what's left by increasing the savings rate.
3. Make a plan Vowing to stick to his training to create a budget is the best way to get around the uncertainty that financial plans always represent. Decide in advance how the costs should be arranged Today, a few money money Apps can help you do this automatically. First, you may not be able to stick to your plans completely, but don't let that cause why you will stop budgeting completely. Use on your like technological solutions. Explore the options and alternatives that allow you to use the available wallet options, and choose the one that suits you best. Over time, you will get used to using these solutions. You will find that they make it easier for you to follow your plan, which would be difficult otherwise.
4. Make savings a habit rather than a goal in the book Nudge, authors Richard Thaler and Cass Sunstein advocate that to achieve any goal, it must be broken down into habits because habits are more intuitive for people to adapt to. While this may seem counterintuitive to many, there are some nimble ways to do so. For example: Always eat outside the home (if at all) on weekdays rather than weekends. Weekends are more expensive. If you are a travel lover, try traveling in the off-season. You will spend significantly less. If you are shopping, always look for coupons and see where you can get the best deal. The key is to absorb actions that lead to savings, not on the savings itself, which is the result. Focusing on the results will lead to a sense of sacrifice that will be more difficult to maintain over a period of time.
5. Talking about this by sticking to a savings schedule (to achieve financial goals) is not an easy journey. There will be many distractions from those who are not aligned with your mission. So to stay the course, surround yourself with people who are also on the same bandwagon. Daily discussions with them will keep you motivated to move forward.
6. Maintain a journal for some people, writing helps a lot in making sure that they achieve what they plan. If you are one of them, maintain a proper journal where you write down your goals and also write down the degree to which you managed to meet them. This will help you in considering how far you have come and what goals you have fulfilled. If you have written commitments on paper, you will feel more energetic to follow the plan and stick to it. Also, it will be a lot easier for you to track your progress. Creating Smart Investment Savings by themselves doesn't take anyone too far. However, saving when invested wisely can work wonders.

1. Consult with a financial investment advisor does not come naturally for most of us, so it makes sense to consult with a financial advisor. Talk to him about your financial goals and savings and then seek advice for the best investment tools to achieve your
2. Choose your investment tool Wisely Though your financial advisor will offer the best investment tools, it doesn't hurt to learn a bit about the common as a savings account, Roth IRA, and others. Just as no one is born a criminal, no investment tool is bad or good. Ok. is the application of this document, which makes all the difference. Usually, for all your short-term financial purposes, choose an investment instrument that is of a debt nature, such as fixed deposits, debt mutual funds, etc. the reason for going for debt instruments is that the chances of losing capital are less compared to equity instruments.
3. The compound the Eighth Miracle Einstein once noticed about the connection: Complex interest is the eighth wonder of the world. Anyone who understands this earns... The one who doesn't... Pays. Make friends with this miracle of a child. The sooner you become friends with him, the faster you will get closer to your financial goals. Start saving early, so time is on your side to help you bear the fruit of the compound.
4. Measure, measure, measure we all do good when it comes to earning more per month, but fails miserably when it comes to measuring investment and summing up how our investments do. If we don't measure progress at the right time, we shoot in the dark. We will not know whether our savings rate is appropriate or not, whether a financial adviser is doing a decent job, or whether we are approaching our goal. Measure everything. If you can't measure it all yourself, ask your financial advisor to do it for you. But do it! Managing your extra money to achieve your short- and long-term financial goals and living a debt-free life is possible for those willing to put in the time and effort. Use the tips above to get you started on your way to setting financial goals.
